

## Problem with Firefox when saving the Sailing Forecast setup as a Bookmark

With the latest version of the Sailing Forecast you can save the current setup (area, parameters etc.) as a bookmark.

However, if you open the bookmark you have saved in Firefox, the Sailing Forecast will be opened in the sidebar instead of the main page.

This can be corrected as follows:

1) Click on the "Bookmarks" menu, find the bookmark, right click on it and select "Properties"

2) In the dialog box, **remove** the tick from "Load this bookmark in the sidebar"
